Subject: Submission of a research paper for consideration in IJCRT

Dear Editor,

We are pleased to submit our manuscript entitled "*Shortcuts and Temporal Leakage in the Bangalore EEG Epilepsy Dataset: a Provenance Audit and Leakage-Aware Benchmark of Lightweight Seizure-Type Classifiers*" for consideration as a research paper in the International Journal of Creative Research Thoughts. Suggested subject area: Computer Science & IT / Health & Medical Science (machine learning for EEG-based seizure classification).

The manuscript audits the public Bangalore EEG Epilepsy Dataset (BEED, UCI repository), on which several studies have reported 95–99% accuracy. It shows that the healthy class is identical to excerpts of the Bonn eyes-closed set, whereas the seizure classes behave as 16-channel time points of continuous recordings, so consecutive rows are near-duplicates and random row-level splits leak information between training and test sets.

Under leakage-aware protocols the pre-specified model reaches a rolling-origin macro-F1 of 0.75 ± 0.08 (four classes) and 0.68 ± 0.10 (three seizure types), and a recording amplitude fingerprint explains most of this performance.

The work offers practical evaluation guidance for anyone using this dataset, and a reproducible pipeline is released with the paper.

In submitting this manuscript, we confirm that:

- the work is original, has not been published elsewhere, and is not under consideration for publication by any other journal or conference;
- all authors have read and approved the manuscript and agree to its submission;
- All data are publicly available (UCI Machine Learning Repository); no new human or animal data were collected.
- the authors declare no conflict of interest [to be confirmed]; funding: [to be confirmed];
- the use of AI-assisted tools is disclosed in the manuscript's declaration section [to be confirmed by the authors];
- the manuscript follows the IJCRT paper format, and its figures are supplied as separate files of at least 300 dpi.

If the paper is accepted, the corresponding author will submit the signed undertaking form and any other required documents. Thank you for considering our work. We look forward to your response.

Yours sincerely,
