To the Organising/Editorial Committee
NIELIT Bio-AI Conclave 2026
NIELIT Guwahati, India

Subject: Submission of a full research paper to Track 5 (Digital Life Sciences, Health, Agriculture & Biodiversity)

Dear Members of the Committee,

On behalf of all authors, I submit the full research paper entitled “Shortcuts and Temporal Leakage in the Bangalore EEG Epilepsy Dataset: a Provenance Audit and Leakage-Aware Benchmark of Lightweight Seizure-Type Classifiers” for consideration at NIELIT Bio-AI Conclave 2026 under Track 5 (healthcare artificial intelligence). The manuscript audits a widely used public EEG epilepsy dataset, shows that its healthy class is copied from an older benchmark and that its seizure classes are temporally autocorrelated, and provides a leakage-aware, statistically grounded benchmark of lightweight seizure-type classifiers with a fully reproducible pipeline. Secondary area of relevance: Track 3 (Computational Biology, Bioinformatics & Research Infrastructure; reproducibility).

In accordance with Section 22 of the submission guidelines, I confirm that:

- the manuscript is original and has not been published previously in substantially the same form;
- the manuscript is not simultaneously submitted to, or under consideration by, another conference, journal or publication venue;
- all listed authors have reviewed and approved the final manuscript;
- all authors have consented to the submission and agree to participate in the review and publication process;
- any actual or potential conflicts of interest have been disclosed in the manuscript (the authors declare none) [authors to confirm];
- no third-party copyrighted material requiring permission is included; all figures were generated by the authors from public data, and all data sources are cited;
- at least one author will complete the required BioAI Conclave 2026 author registration if the manuscript is accepted;
- the use of AI-assisted technologies is disclosed in the manuscript’s declaration [authors to finalise].

The submission comprises the manuscript (DOCX and identical PDF), the supplementary document (DOCX and identical PDF) and a supplementary code-and-results archive. The review copy has been anonymised for double-blind review.
